

Threatened trees on Prince of Wales Road

A tree walk was carried out on the section of Prince of Wales Road from Manor Top to the Parkway. This is a busy dual carriageway that forms part of the Sheffield Outer Ring Road. The following trees could possibly be in danger of felling if the City Council do not change their current policy of felling trees that are disturbing the pavement or the kerb. These trees provide numerous important benefits for the local residents.

1. They protect residents and school pupils from the noise pollution of the heavy traffic.
2. They absorb pollution from the cars in an area where the air quality is very poor.
3. They soak up rainwater, reducing the risk of flash flooding.
4. They give shade in hot summers.
5. They are an important visual amenity.
6. They are an important habitat for birds and wildlife.
